

```
1: (k)
2: Prgm
3: @sendkeyh(k) injects the ASM keycode `k`.
4:
5: The AMS interface will react unless if a dialog or popup is active.
6:
7: `k` must be a string containing a capitalized hexadecimal number padded to 4
  digits, big endian. No `0h` notation.
8: Local k
9:
10: If dim(k)=4 Then
11:   Exec
    "207800C820680338487A000C3F3CFFFE4E905C8F4E750710000000000000000"&k&"0000"
12: EndIf
13:
14: EndPrgm
```
